AI-Generated Insights

AI INSIGHTS (Rule-Based)

■ Executive Summary

The system handled 500 total calls with an average answered duration of 15.02 minutes.

■ Key Findings

- Total calls processed: 500
- Missed call rate: 13.4% (67 calls)
- Average call duration: 15.02 min
- Peak hour: 11:00

■■ Anomalies

■■ Elevated missed call rate: 13.4%. Consider adding capacity.

■■ Long average duration (15.02 min). Review escalation procedures.

■ Branch Performance

■ Highest volume: Tanta (108 calls, 12.96% missed)

■ Lowest volume: Cairo HQ (92 calls, 9.78% missed)

■ Recommendations

1. Review call routing during peak hours to reduce missed calls.
2. Schedule staff training and breaks during low-traffic windows.
3. Ensure maximum staffing around 11:00 (peak hour).
4. Set up automated callbacks for all missed calls.
5. Review branches with >20% missed rate for capacity issues.
